

# Give!

## ABOUT STEM MARIN & STEM MARIN FUND

With award-winning staff and leading-edge curriculum, as well as state-of-the-art facilities in the works, STEM Marin—home to STEM Program and Biotech Program at San Marin High School in Novato, California—is becoming one of the strongest high school STEM programs in the nation. The overwhelming majority (upwards of 84%!) of STEM Program and Biotech Program graduates are pursuing STEM degrees at four-year colleges, including Caltech, Columbia, Dartmouth, Virginia Tech, Harvey Mudd and nearly every UC and CSU in the state. STEM Marin Fund became a non-profit, tax-exempt 501c3 organization in 2014 to secure grants and donations to support STEM Marin.

## GOALS

It's costly to deliver a top-notch STEM program within a public school. To provide the facilities, technology, supplies and hands-on, real-world opportunities we want for our students and teachers—including lab equipment, tools and materials as well as relevant programming, curriculum, guest speakers, field trips, professional development and scholarships—STEM Marin Fund needs you!

*STEM Marin students are today's young innovative thinkers and makers and tomorrow's global citizens whose life-changing discoveries and inventions might just solve our world's most pressing problems. **An investment in their future is an investment in your own.***

**Return to: STEM Marin Fund, 926A Diablo Ave. #101, Novato, CA 94947**

## Of Note

**STEM Program** seniors work with Gross Field Community Association to build a functional 2-seat light sport metal airplane!

**Biotech Program** partners with local organizations for student internships, job shadowing, guest speakers and field trips.

**NUSD** breaks ground summer 2019 on a 20,000-sq-ft STEM building at San Marin, to include ten lecture-labs/prep space and indoor/outdoor collaborative teaching spaces.
